Summary

Software Developer with hands-on experience building enterprise applications using Java, Spring Boot, REST APIs, databases, authentication, and automated testing. Experienced in modular application development, database integration, debugging, optimization, and Git-based collaboration. Strong foundation in DSA, OOP, API design, and software architecture.

Technical Skills

Languages: Java, ABAP, Python
Frameworks: Spring Boot, Spring Security, Hibernate/JPA
Web & APIs: REST APIs, JWT Authentication, API Integration, Swagger
Databases: MySQL, MongoDB, PostgreSQL
Tools: Git, GitHub, Maven, Postman, JUnit, Docker, Kafka
Core Concepts: Data Structures & Algorithms, OOP, Multithreading, LLD, Software Architecture

Experience

BeanGate IT Solutions Pvt. Ltd.

Software Engineer Intern

Remote

Sep 2025 – Mar 2026

- Developed **5+ backend modules** using Java and Spring Boot, following clean architecture and object-oriented design principles.
- Designed RESTful APIs with input validation, authentication, database integration, and reusable service-layer components.
- Designed and optimized MySQL schemas and queries for application workflows and data persistence.
- Implemented JWT-based authentication and authorization; performed API testing with Postman and unit testing with JUnit.
- Debugged application issues and collaborated in an Agile development environment using Git and GitHub.

Internship Projects: Beangate Platform, Divya Jyoti NGO Platform

Projects

EosCarbon – Blue Carbon MRV Solution

[GitHub](#) | [Live Demo](#)

Spring Boot, MongoDB, JWT, Microservices, AI Integration

- Engineered backend workflows with **6+ APIs** for project registration, evidence upload, onboarding, and verification.
- Implemented JWT authentication, role-based access control, validation, pagination, sorting, and global exception handling.
- Designed MongoDB schemas for environmental datasets and integrated AI-assisted geospatial verification into the workflow.

HelixCare – Microservices Healthcare Platform

[GitHub](#)

Spring Boot, Kafka, PostgreSQL, Docker, JUnit, Testcontainers

- Designed and implemented **6+ microservices** using Spring Boot and Kafka for asynchronous service communication.
- Designed PostgreSQL schemas and integrated Docker-based services for persistent storage and deployment workflows.
- Developed unit and integration tests using JUnit and Testcontainers to validate service behavior.

Auz – Personal AI Desktop Assistant

[GitHub](#)

Python, Speech Recognition, Text-to-Speech, Automation

- Built a voice-controlled desktop assistant capable of automating **10+ daily system tasks**.
- Integrated speech recognition, text-to-speech, application launching, media control, and command-based automation.

Education

Rajiv Gandhi Proudlyogiki Vishwavidyalaya (RGPV)

Sep 2023 – Jun 2027

Bachelor of Technology in Artificial Intelligence and Machine Learning

CGPA: 8.25/10

Shining Public Higher Secondary School

10th & 12th Grade, MP Board

2021 – 2023

89% / 84%

Achievements

- Solved **950+ DSA problems** across LeetCode, CodeChef, and Codeforces.
- 1st Place** – Technocrats Hackathon, among **160+ teams**.
- 3-Star Coder** on [CodeChef](#) and **2-Star Coder** on HackerRank (Java).
- Recognized by **ISRO** for idea submission at the Bharatiya Antariksh Hackathon 2025.
- Earned the **Google Scalable Java Microservices** badge.

[Certificate](#)

Certifications

- SAP Certified – Back-End Developer – ABAP Cloud**
- Anthropic – Claude Code in Action**
- Accenture – Coding: Development & Advanced Engineering Job Simulation**
- GeeksforGeeks Campus Mantri Program – Technical Head**
